- The effects of fiscal policy on economic growth in Kenya using machine learning techniques.

PROFESSIONAL PROFILE

A Financial Economics and Data Science professional with a strong interdisciplinary foundation spanning economics, finance, information technology, and quantitative analysis. Currently progressing through CPA Intermediate level, with developing expertise in financial reporting, auditing principles, and strategic financial management. I combine analytical rigor with technical proficiency in Python, Excel, and Stata to extract, process, and interpret complex datasets for evidence-based decision-making. My academic and practical exposure in data science has strengthened my capabilities in statistical modeling, data visualization, and financial analytics. Passionate about leveraging data-driven insights to solve economic and financial problems, improve business performance, and support strategic planning. I am particularly interested in roles at the intersection of finance, analytics, and technology, where I can contribute to impactful decision-making and continuous process improvement.

CORPORATE EXPERIENCE

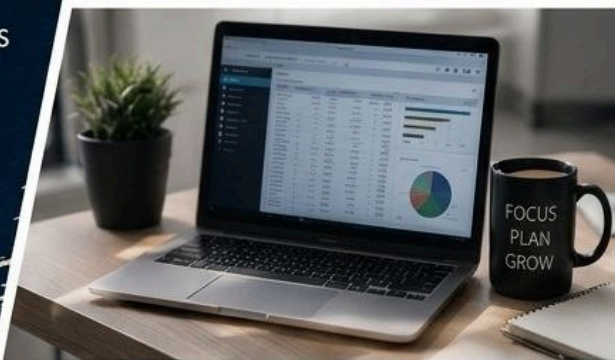

JADONGAR INVESTMENT LTD

INTERN / ASSISTANT

Worked closely with the finance team on real estate and investment related financial operations.

-  Assisted in property documentation and transaction tracking

-  Assisted in maintaining financial and vouchers
-  Supported data entry and ledger updates and vouchees
-  Participated in bank bank reconciliation and document verification
-  Observed month-end closing and reporting processes

LANGUAGES

English– Fluent
Kiswahili –Native

ACADEMIC PROFILE

KASNEB

CPA (Certified Public Accountant) - Intermediate level (In progress)

Currently pursuing the CPA qualification under KASNEB, with progression to the Intermediate level. The program is building a strong professional foundation in core accounting and finance disciplines, including Financial Reporting, Auditing and Assurance, Taxation, Management Accounting, Business Law, and Financial Management. Through this certification, I am developing advanced competencies in preparing and interpreting financial statements, applying accounting standards, evaluating internal controls, and supporting decision-making through accurate financial analysis. The training also strengthens my understanding of regulatory compliance, corporate governance, and ethical financial practices. This qualification complements my academic background in Financial Economics and Data Science, enhancing my ability to integrate accounting knowledge with analytical and data-driven approaches for effective financial and business analysis.

DATA UPSKILL

Data Science & Analytics

I have a strong foundation in Data Science and Analytics, developed through both academic training and practical upskilling in Python, Stata, and Microsoft Excel. I am proficient in using Python for data manipulation, analysis, and visualization, Stata for econometric and statistical analysis, and Excel for advanced data organization, modeling, and reporting. Through these tools, I am able to clean, analyze, and interpret complex datasets to generate meaningful insights that support evidence-based decision-making. My skills continue to grow through continuous practice and application in financial, economic, and real-world data scenarios.

MASENO UNIVERSITY

Bachelors of Science (Economics and Finance With IT)

Distinction: Second Class Honours(Upper Division)

I completed a Bachelor’s degree in Financial Economics and Data Science with Information Technology at Maseno University, where I gained a strong interdisciplinary foundation in economics, finance, and computing. The program equipped me with knowledge in microeconomics, macroeconomics, financial management, econometrics, and information technology systems. Through this training, I developed strong analytical and quantitative skills, enabling me to interpret economic and financial data, apply IT tools in problem-solving, and support data-driven decision-making in business and economic contexts.
