Introduction

About me

- I am a results-driven Financial Economist and Data Analyst and CPA candidate with a Bachelor of Science in Economics and Finance from Maseno University. My expertise lies in translating complex data into actionable business insights through financial modeling, statistical analysis, and risk assessment using tools such as Python, STATA, and Excel. With hands-on experience in financial reporting and internal controls gained within the real estate and manufacturing sectors, I am committed to delivering high-quality results with accuracy and integrity in dynamic professional environments.
-

Professional projects

Financial Analysis and Reporting Practice

Developed practical experience in analyzing financial records and preparing structured reports. Focused on improving accuracy, organization, and interpretation of financial data to support informed decision-making.

Accounting Systems Exposure

Gained hands-on exposure to accounting processes during attachments, including record management, documentation, and basic financial operations across real estate and manufacturing environments.

Data Analysis Development (Ongoing)

Currently building foundational skills in data analysis using tools such as Microsoft Excel to enhance financial reporting, identify patterns, and improve efficiency in accounting tasks.

Project Portfolio

- As a performance-focused Financial Economist and Data Analyst and CPA candidate with a Bachelor of Science in Economics and Finance (with IT) from Maseno University, I specialize in translating complex data into actionable business insights. My expertise in financial modeling, statistical analysis, and risk assessment is supported by technical proficiency in Python, STATA, and Excel, alongside practical experience in financial reporting and internal controls gained at Ngere Tea Factory and Jandongar Investment LTD. Building on this foundation, I am currently conducting a research project on the determinants of accountancy fraud and its impact on financial reporting quality in Kenyan SACCOs. Committed to professional integrity and accuracy, I aim to approach every task strategically to deliver high-impact results in dynamic organizational environments.

Translating Complex Data into Actionable Insight

A results-driven financial analytics professional bridging the gap between raw numbers and strategic business insights. Leveraging a strong foundation in financial economics and data science, I deploy advanced statistical analysis and risk assessment to support data-driven decision-making, improve performance, and enforce rigorous internal controls.

Financial Modeling

Advanced forecasting, statement analysis, and performance tracking to drive organizational growth.

Technical Data Analytics

High-level proficiency in Python, STATA, and Excel for econometric modeling and visualization.

Applied Economic Research

Demonstrated analytical rigor through comprehensive research evaluating the financial performance and operational frameworks of Kenyan SACCOs.

& analytics

Testimonials

Real Estate & Finance (Based on Jandongar Investment LTD)

Boniface demonstrated exceptional attention to detail while assisting with our financial record-keeping and real estate investment operations. His ability to manage transaction data and prepare accurate financial reports significantly supported our administrative efficiency.

Manufacturing & Internal Controls (Based on Ngere Tea Factory Co. Ltd)

During his time with us, Boniface showed great proficiency in handling complex tasks like payroll processing and transaction reconciliation. His commitment to maintaining high professional standards and his grasp of internal financial controls were invaluable to our cost accounting team.

Project Portfolio

Maseno
University

PROJECT 1

Stock Price Prediction Model: A technical project where you built a predictive model in Python using historical data from the Nairobi Securities Exchange (NSE), applying linear regression and ARIMA time series forecasting.

<https://iconiccalvin.github.io>

Data Upskill

PROJECT 2

The Effects of Fiscal Policy on Economic Growth in Kenya: Your undergraduate final year project at Maseno University, which utilized machine learning techniques and Stata to estimate the impact of fiscal policies on the Kenyan economy.

<https://iconiccalvin.github.io>

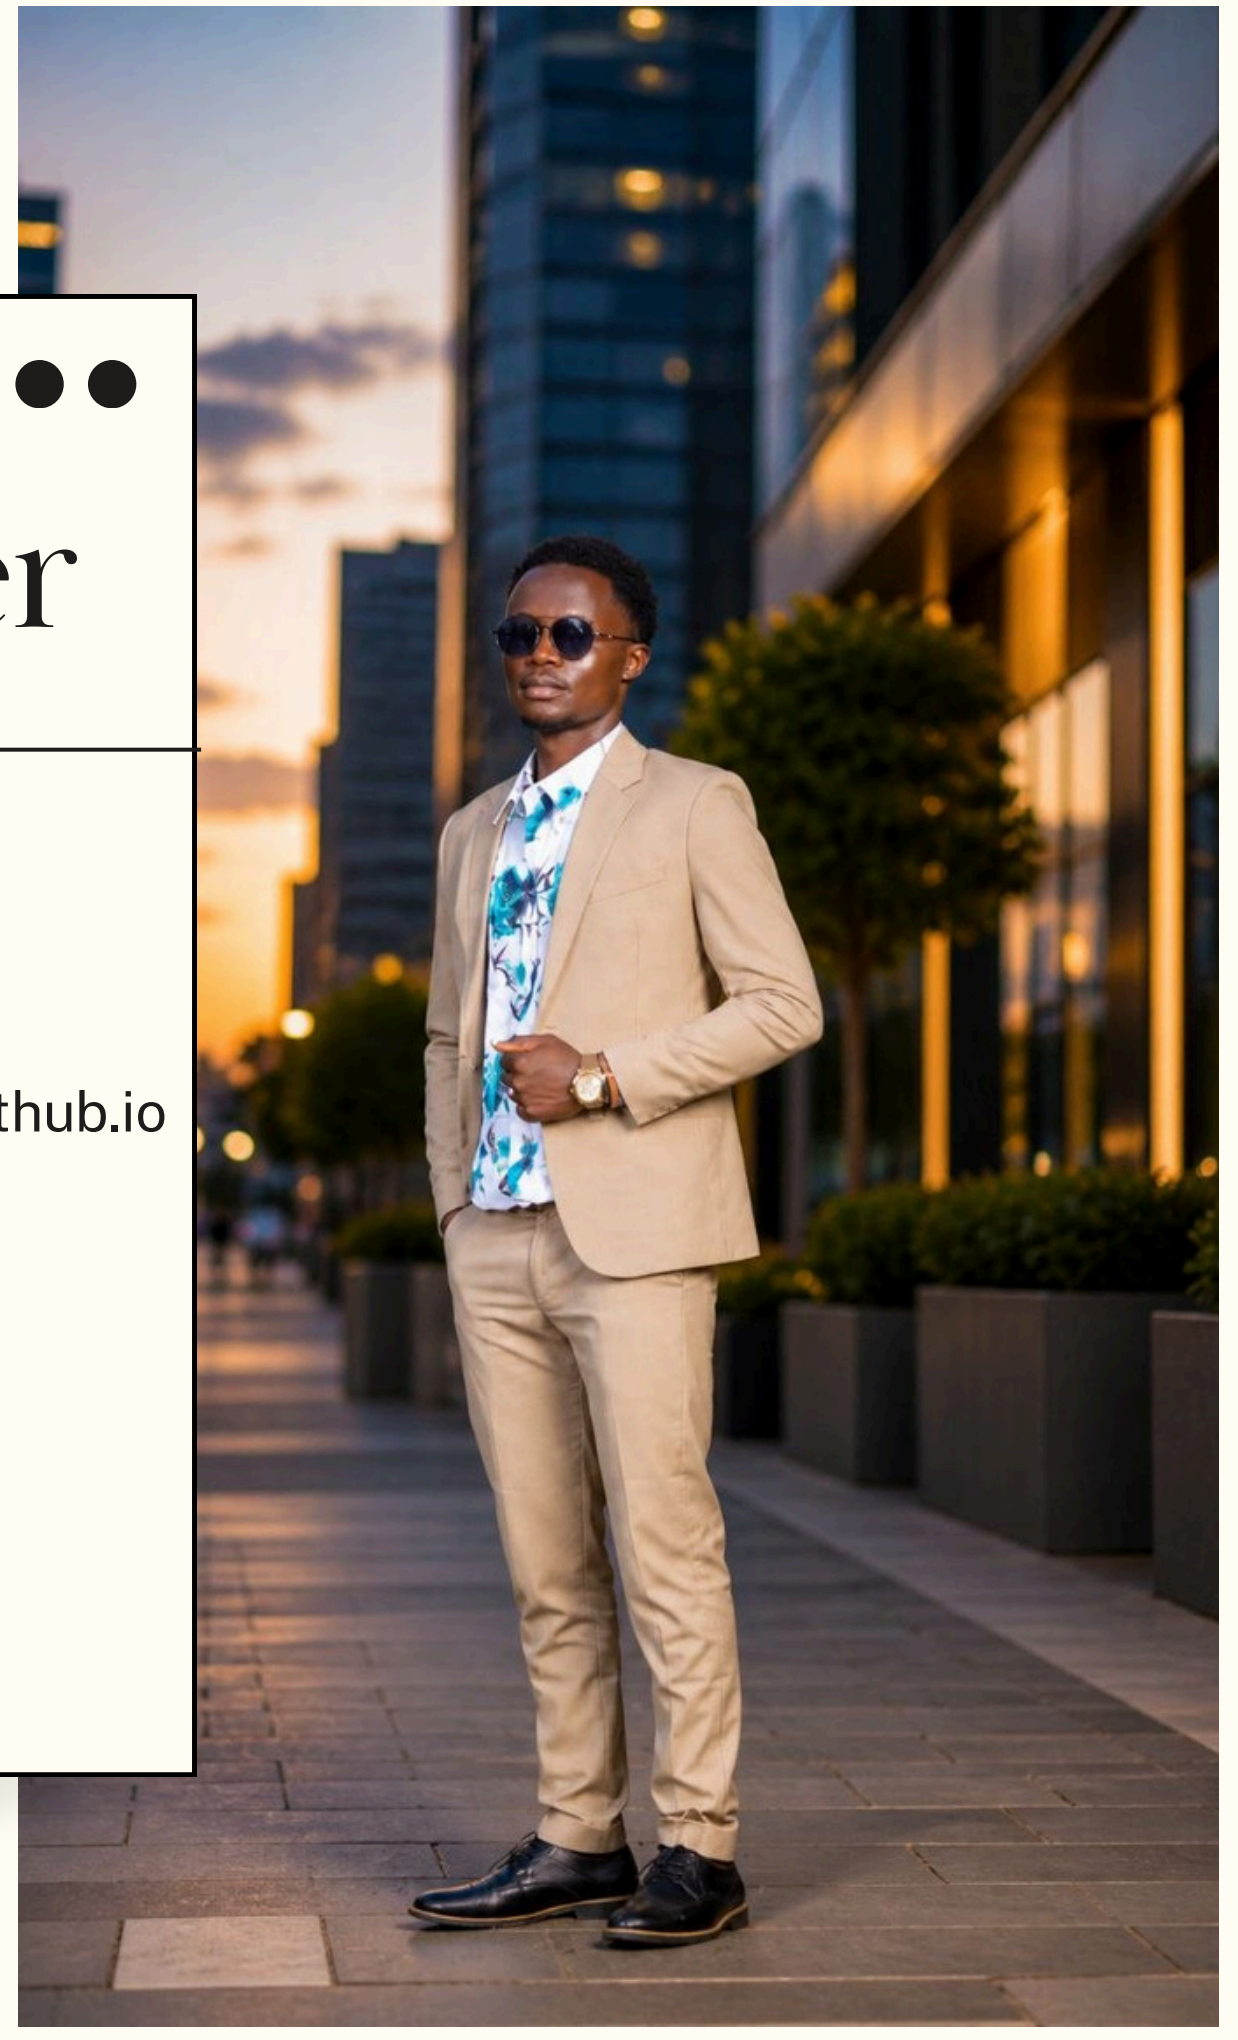

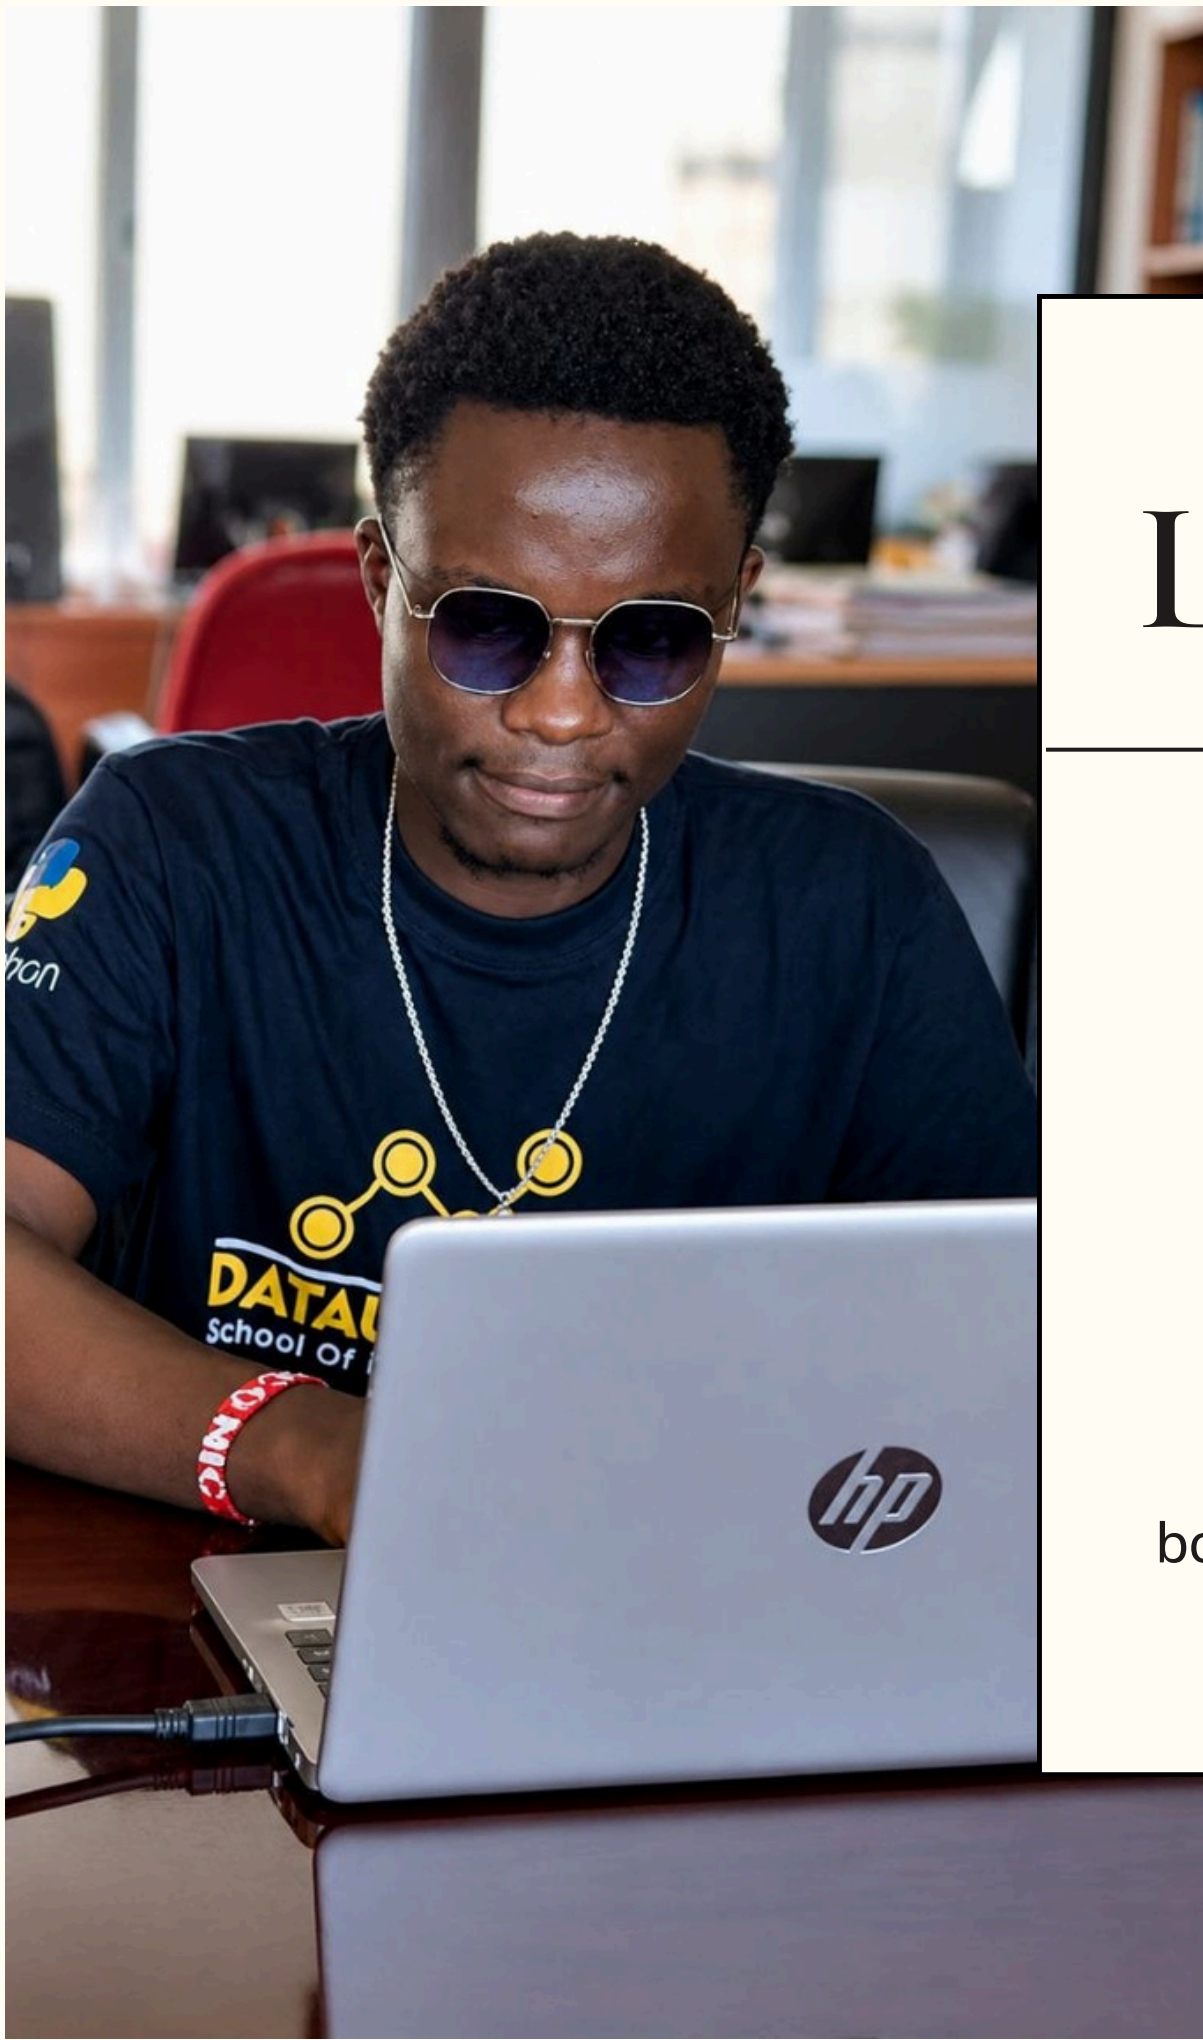

Iconic Creatives

PROJECT 3

Determinants of Accountancy Fraud and Its Impact on Financial Reporting Quality in Kenyan SACCOs: An ongoing specialized study you are conducting to analyze fraud risk factors and their effect on transparency within the Kenyan SACCO sector.
